Celebration of International Women' Day

Theme "Rural and urban activists transforming women' lives"

On

8 March, 2018 (Thursday)

Request:

On Thursday, March 8 2018, our University will be joining a world-wide celebration of Women's Day.

This year, International Women's Day comes on the heels of unprecedented global movement for women's rights, equality and justice. Sexual harassment, violence and discrimination against women have captured headlines and public discourse, propelled by a rising determination for change.

The goals of Women's Day are to raise visibility and ability of woman in various fields of social, economic, education, politics, sports, cultural etc. It offers a powerful way to put the spotlight on women' existence and this contribution in our life. We are planning one day [Sari wrap up, Nail art or nail painting and Elocution events] for the same and we anticipate your kind help.

Background on Women' Day:

International Women's Day is celebrated on the 8th of March every year to appreciate the contribution of the women to the society as well as their economic and political achievements, to celebrate the acts of courage of ordinary women, and to reflect upon the progress made.

Today's women have excelled in all fields ranging from household to politics and management. They are setting new benchmarks in all walks of life. They have conquered new horizons. If they can manage the household with ease, so can they scale the highest summit or even travel to space. Thus, to honor the achievements of women all across the globe, the International Women's Day is observed every year on March 8.

International Women's Day 2018 is an opportunity to transform this momentum into action, to empower women in all settings, rural and urban, and celebrate the activists who are working relentlessly to claim women's rights and realize their full potential. International Women's Day will also draw attention to the rights and activism of rural women, who make up over a quarter of the world population and majority of the 43 % of women in the global agricultural labour force. This will build audience for our work and also give the community members an ongoing sense of involvement and a chance to learn about Women' perspective on the world.
