## **Ice Breaking Session for Junior Students to Welcome**

Starting the new College or walking into a new room every day as a substitute can become pretty draining and confronting for both teachers and students. Luckily, there are things one can do to break the ice and make the kids feel a lot more enthused and comfortable about learning.

Icebreakers may seem trivial but they can assist with building meaningful relationships with students. This easy icebreaker from Cult of Pedagogy is sure to get everyone moving, conversing, and discovering their similarities. A Great Wind Blows may ease the fears of younger children who are anxious about starting their first year of college. It also establish a collaborative, cooperative learning environment and encourages team building and critical thinking among students and enhance learning about one another.

**C U Shah Institute of Life Sciences**, Surendranagar had organized an Ice Breaking Session to formally Welcome Junior Students and to brief them about various activities of the University by senior batch students. It was organized under guidance and support of **Dr. Girish K. Goswami** Dean, Faculty of Science and **Dr. Manish Soni**, HOD and Assistant Professor in Microbiology Department, with prior permission and guidance of **Dr. Vedvyas Dwivedi**, Pro. VC, C. U. Shah University.

The programme was organized with the kind efforts of **Ms. Priya Mehta**, Assistant Professor in Microbiology Department and **Ms. Ankita Murnal**, Assistant Professor in Microbiology Department . In addition, students of B.Sc Microbiology., especially **Veena, Honey, Prem, Purva, Jaydeep, Montu, Priyal** and **Dharmik** have taken hard efforts and initiative for successful implementation of this event.

**Ms. Priya Mehta**

Asst. Professor
